Summary

Passionate about web development and digital technologies, with practical experience gained through projects and internships. Skilled in building responsive web interfaces and eager to apply my skills and learn new technologies.

Education

B.E. Computer Science and Engineering

Oct 2022 – Jul 2026

University College of Engineering, Tindivanam - CGPA: 7.84

Internship Experience

Python – Besant Technologies

Oct 2025

Built beginner automation scripts, logic-based solutions, and file handling projects for programming fundamentals.

Full Stack Development Intern – RKS Infotech

July 2025

Hands-on experience to develop website frontend using HTML, CSS, JavaScript, and WordPress.

Project

TinyRS-R1: Compact Vision Language Model for Remote Sensing

- Developed TinyRS-R1, a 2B-parameter AI model for satellite image analysis, classification, and VQA tasks.
- Applied transformer-based training and fine-tuning techniques for Machine Learning and Computer Vision applications.

Dust Monitoring System using ESP32 and Blynk (IoT Project)

- Developed a smart dust monitoring system using ESP32 and Blynk to track dust levels and provide real-time alerts through LEDs and a buzzer.
- Applied IoT concepts, sensor monitoring, and microcontroller-based automation while testing and simulating the system in Wokwi.

Python Mini Projects

- Created mini projects including a Rock-Paper-Scissors game, Calculator, and To-Do List using Python.
- Gained hands-on experience in Python programming, logic building, debugging, and application development.

Technical skills

Programming Languages: Python, Java(basics).

Tools & Platforms: Git, VS Code, Canva, Wordpress.

Web Technologies: HTML, CSS, JavaScript.

Soft Skills

Communication .

Time Management.

Adaptability&Team Work.

Certifications

Java (NPTEL) - 71% 2025

MERN Stack (Edunet) 2024

Prompt Engineering(NM)2023

CyberSecurity (novitech) 2024

Salesforce CRM (Naan Mudhalvan) 2024

python (codsoft) 2023
